

I am writing to urge the FCC to reject the National Association of Broadcaster's petition 04-160. As a paying customer of XM Radio, I believe that it is well within my rights to access weather and travel information in a timely and localized manner. I believe that XM radio is acting fairly and appropriately by developing a system of access to this information, and that it would be an unfair intrusion on their business rights and my rights as a consumer for these function to be restricted.

Michael Gillette
